Developer

OBJECTIVE

I am a Software Engineering student with experience in Fullstack development, Artificial Intelligence and Data Science. I have worked in server testing and maintenance with Java, and I currently develop scalable applications based on microservices using NestJS and React. I specialize in creating efficient systems, ensuring a seamless integration between backend and frontend technologies. With a constant focus on professional improvement, I obtain certifications and always seek to expand my skills to meet new technological challenges.

EXPERIENCE

Nov 2024 - March 2025	Developer Intern Zeetech Toluca In backend, I optimize the architecture with NestJS (TypeScript) to ensure scalability and efficiency. In frontend, I develop dynamic interfaces with React, applying best practices in state management and modular design. In addition, I facilitate the integration between frontend and backend, ensuring a smooth user experience and optimal application performance.
Sep 2023 - Feb 2024	Social Service in Testing & Maintenance Instituto Tecnológico de Toluca Toluca I played a key role in server testing and maintenance, ensuring the efficient deployment of new systems. I implemented integrations, executed rigorous testing to ensure security and performance, and prepared detailed technical manuals. In addition, I collaborated in identifying and solving problems, maintaining server stability and aligning systems with the institution's strategic objectives.

EDUCATION

Present	Final year in Software Engineering Universidad Autónoma del Estado de México Toluca
---------	--

SKILLS

Git y Github | Team work | Microservices | Testing & Maintenance | Continuous learning | Flexibility

LANGUAGES

SPANISH Native
ENGLISH Advanced

CERTIFICATIONS & COURSES

Java and Spring Boot training ONE
Python 101 for Data Science Cognitive Class
Introduction to web development course: HTML y CSS I y II Google Activate
JavaScript Programming Logic Training ONE
